Interfor Regal AK ARCHITECT KNOTTY DECKING

Interfor's Regal AK Western Red Cedar decking offers the environmentally conscious consumer a renewable and biodegradable product. Cedar's natural preservatives protect against decay and insects, which means no harmful chemical treatment is required. No warranty can equal Cedar's track record and consistent performance. Above all, the beauty of Regal AK architect knotty decking cannot be matched by any composite or plastic decking material.

Interfor Regal AK

ARCHITECT KNOTTY DECKING

Interfor's commitment to producing consistent and high quality Western Red Cedar products is reflected in its Regal AK decking. Starting with a reliable and consistent fiber supply, Interfor is able to offer customers products that meet superior standards from order to order. Regal AK meets and exceeds the WRCLA architect knotty standards. Wane is strictly limited to one face and kept to a minimum, making the product useable for all types of projects.

Interfor's Regal AK decking is the product of choice for the environmentally conscious builders or homeowners seeking to add the beauty and prestige of a "chemical free" product at an affordable price.

Standards that set Regal AK architect knotty decking apart from the competition:

- Knots are sound and tight, allowing a maximum of two not firmly fixed knots per 12 lineal feet (NFF knots of ½ max size are allowed)
- Maximum knot size: 2x4 – 2", 2x6 – 2 7/8"
- Holes are not permitted
- Wane is strictly limited to one face and kept to a minimum of ¼ thickness and ¼ width on the reverse face only

Nominal (inches)	Net (inches)	Dressing	Seasoning	Pieces per package	Lengths
2 x 4	1 9/16 x 3 9/16	S4S	Green	208	8 – 20' ELO
2 x 6	1 9/16 x 5 9/16	S4S	Green	128	8 – 20' ELO

Finishing and Maintenance:

- Cedar weathers over time to an attractive silver-gray patina that has a certain architectural appeal, research chemists and wood scientists strongly recommend that some form of protective finish be applied to prevent surface degradation.
- Never allow Western Red Cedar to 'weather' for more than two weeks prior to finishing. All finishes adhere and perform better when applied to fresh, unweathered wood
- Power washers are not recommended for use on Western Red Cedar
- For best results, Western Red Cedar should be coated on all sides before installation. Factory finishing, where available, is a preferred method.
- Consult WRCLA website (www.cedar-deck.org) for more detailed information

Distributed By:

International Forest Products Limited (Interfor) is one of Western Canada's largest logging and sawmilling companies. Operating on the coast of British Columbia as well as in the central interior, Interfor produces quality products for worldwide distribution. All of Interfor's woodlands are 100% SFI (Sustainable Forestry Initiative) certified and third party audited under ISO 14001 (Environment Management Systems). This ensures the products you receive are produced in an environmentally sustainable basis.
