* Typical shipments include 10% trims.

** 1/2 x 8 FJ Bevel available as Clear mixed grain and Texface. Typical shipments include 15% trims.

Finishing and Maintenance:

- All finishes adhere and perform better when applied to fresh, unweathered wood.
- Never allow Western Red Cedar to "Weather" for more than two weeks prior to finishing.
- Power washers are not recommended for use on Western Red Cedar.
- For best results, Western Red Cedar should be coated on all sides before installation. Factory finishing, where available, is a preferred method.
- Consult WRCLA website (www.cedar-siding.org) for more detailed information.

International Forest Products Limited (Interfor) is one of Western Canada's largest logging and sawmilling companies. Operating on the coast of British Columbia as well as in the central interior, Interfor produces quality products for worldwide distribution. All of Interfor's woodlands are 100% SFI (Sustainable Forestry Initiative) certified. In addition, select coastal operations are FSC certified. This ensures the products you receive are produced in an environmentally sustainable basis.
