INTERFOR SOUTHERN YELLOW PINE MSR LUMBER

BEST FOR QUALITY & PERFORMANCE

Interfor SYP 2400F MSR (Machine Stress Rated) Lumber starts with the finest fiber, guaranteeing strength and stiffness, with consistent dimensional stability.

- Manufactured with No. 1 wane rule, providing a product that looks as good as it performs.
- Graded according to strict American Lumber Standards, our MSR meets the highest standards for framing and truss applications.
- The grade limits knot size, thereby providing maximum structural strength and durability.
- SYP, being one of the densest softwood lumber species, will cleanly hold plating and fasteners.

- Product is kiln dried to maximize stability and yardability and to minimize warp and shrinkage.

SYP 2400F is produced at our Meldrim, Preston, Perry and Swainsboro mills, offering our customers availability and consistency of supply.

BEST FOR ENVIRONMENT

Wood from responsible sources is by far the best building choice. Interfor's log sourcing activities are certified by an accredited third party agency to meet our high environmental standards. Precision manufacturing and machine grading allow us to maximize MSR Lumber yield from our valuable forest resource.
